

Fertilization Service Scheduled

We have been informed by FitTurf that a broad-leaf weed control service of the Fountain Greens HOA common area turf is scheduled to be completed on **Friday May 1st**. This is the initial pre-emergent weed control/fertilization application for the season that will be completed. Homeowners should take precautions that they feel are necessary, and possibly keep children/pets off of the turf. This initial application is a granular application.

As a general reminder: Treated areas will be marked with flags: Please note that all treatments for weeds are required to be labeled as pesticide applications under Colorado regulation. Liquid Application Spray is considered safe when completely dry, but those with sensitivities to synthetics/chemicals and concerns regarding weed treatment may wish to avoid these areas for longer than drying time. Residents with concerns regarding fertilizer pellets may wish to avoid turf areas for a couple of days.

Should poor weather conditions prevail, Fit Turf will perform the scheduled treatments for the next available business day.

All applications are subject to weather delays.

700 Ken Pratt Blvd., STE. 111,
